ABOUT ME

Full-Stack Developer focused on building practical, product-oriented web and mobile applications. Currently a Software Developer at Axanta Business Solutions, developing and maintaining Odoo-based ERP systems and custom business functionality. Alongside my job, I independently build and ship software products and client applications, including The Rida Stories, BizMate and QuoteCraft, and run HMcreations53, my web and software development studio. Technical focus: React, TypeScript, Next.js, Python, Odoo, Flutter, Supabase and PostgreSQL. I enjoy taking a requirement from idea to a working solution through development, testing, deployment and iteration.

WORK EXPERIENCE

Software Developer – Axanta Business Solutions (Axanta ERP), Pune — Feb 2026 – Present

- Develop and maintain Odoo-based ERP systems, working across core business modules, enterprise workflows and business logic.
- Design and develop custom Odoo modules to improve productivity, streamline business processes and extend ERP functionality.
- Build and customize Odoo interfaces using QWeb and frontend components to support business requirements and user workflows.
- Investigate and resolve production bugs and functional issues across Odoo modules, including database-level and business-logic problems.

Software Engineer Intern – NBK Software Solutions — Jul 2025 – Oct 2025

- Led the end-to-end development of the Autoinsure fintech mobile application for Bhartiya Bima Fintech using Flutter and Dart.
- Handled the development lifecycle from technical documentation and feature implementation through QA testing, bug fixing and production release.
- Developed and integrated application features while ensuring functionality aligned with project requirements.
- Coordinated the development process and took ownership of delivering the application through to Google Play Store publication.

PROJECTS

The Rida Stories — 2026 | theridastories53.vercel.app

Fashion storefront for browsing a curated clothing collection, with orders taken directly through WhatsApp, plus an admin panel dashboard to manage products, collections and the overall website. *Stack: React, Vite, TypeScript, Tailwind CSS, Supabase*

BizMate — 2026 – Ongoing | mybizmate.vercel.app

Free web toolkit for Indian freelancers and small businesses: GST calculator, invoice and quotation generators, and saved-document management, with auth-gated profile auto-fill and a full PWA setup. *Stack: React, Vite, TypeScript, Tailwind CSS, Supabase, Zustand*

QuoteCraft — 2026 | myquotecraft.vercel.app

Project pricing and scope estimator for freelancers and creative studios: turns deliverables, effort hours, expenses, contingency risk and target profit margins into defensible quotes, with multi-currency support and client-ready summaries. *Stack: Next.js, React, TypeScript, Tailwind CSS*

Bakhtawary Portfolio — 2026 | bakhtawary-portfolio.vercel.app

Professional portfolio website presenting Mustafa Bakhtawary's experience across business development, sales, technology and software solutions through a polished, responsive web experience. *Stack: React, TypeScript, Vite, Tailwind CSS*

HMcreations53 — 2026 | hmcreations53.vercel.app

My freelance dev-studio brand: a landing page showcasing web, mobile and custom development services, with a live project showcase, a working contact form and a custom hexagonal “HM” logo system. *Stack: React, TypeScript, Vite, Web3Forms*

UtilVerse – Android App — Jul 2023 – Apr 2024

Android multi-utility app built to cut daily friction: calculators, task managers and schedulers bundled into one productivity tool, built on a structured Flutter project workflow. *Stack: Flutter, Dart*

SKILLS
